

Volume 25, Number 5, October 2024

CONTENTS

Research Articles

Sustainability development using fiber-reinforced concrete beams with partial replacement of fine aggregate with recycled waste tire rubber powder	<i>Thiagarajan Kumanavallal and Umamaheswari Nambiappan</i>	717
Preparation and application of nanoceramic material-modified flyash in passive building envelope	<i>Wenjun Yang and Jing Chen</i>	727
Effect of different Ba-sources on the sonochemically activated solid-state synthesis of BaTiO₃ powders	<i>Hae Won Lee, Min Ho Jang, Ga Young Lee, Gil-Geun Lee, Woo Hyun Nam and Young Soo Lim</i>	737
Study for development of a construction ceramic material from metallurgical wastes using a DOE approach	<i>Mitsuo Ramos Azpeitia, Jose Luis Hernández Rivera and Jose de Jesus Cruz Rivera</i>	742
Effects of polyacrylic acid-based binder on electrical property of potassium-sodium niobate ceramic	<i>Jinjin Lin, Jiixin Duan, Jiahao Huang, Ya Yang, Mingxing An, Zhiming Gao and Yuanyu Wang</i>	751
Constitutive modeling of transition in a micro-alloyed forging steel from static to metadynamic recrystallization	<i>Wen-Bo Yang, Ji-Peng Zhao, Tian-Ju Ma, Jian-Jun Zhang, Hai Zhang, Xue-Hu Yang and Gang-Gang Li</i>	760
Eu₂O₃-doped transparent glass-ceramics containing nanoscale crystals for tunable Blue-to-Red photoluminescence	<i>Yeonju Kim and Seunggu Kang</i>	768
Preparation and aging properties of BiFe_{1-x}Al_xO₃ ferroelectric thin films	<i>Pang Hui, He Jingxian, Kong Qingfeng and Zhang Fengqing</i>	776
Development of carbon fiber and BN reinforced composites for enhanced mechanical performance in sporting goods	<i>Yuancai Zhang and Feng Wang</i>	786
Examining the impact of sintering conditions on the microwave dielectric properties of Ca_{0.61}M_{0.26}TiO₃ (M=La³⁺, Nd³⁺)	<i>Chun-Hsu Shen, Chih-Hsuan Hu, Jing-Yuan Chen, Wen-Hui Chen, Chen-Wei Tung, Yun-Hsien Yang and Ting-Yu Yang</i>	790
Experimental study on mechanical properties of PVB materials based on laminated glass	<i>Tang Peng</i>	798
Ultrasonic non-destructive evaluation of porosity in particle-reinforced metal matrix composites with mean grain size	<i>Ahmet Yonetken and Vildan Ozkan Bilici</i>	805

Investigation of mechanical properties of mullite-calcium oxide-zirconium dioxide ceramics	<i>Mehmet Akif Hafizoğlu, Ahmet Akkuş and Ömer Karabey</i>	814
Chromogenic mechanisms of overglaze red pigment produced in the Jingdezhen kiln during the Ming dynasty	<i>Meng Hao, Maolin Zhang, Yanjun Weng and Zhe Xiong</i>	827
Real-time detection of lithium precipitation during battery charging	<i>Jing Ning, Bing Xiao and Zhong Wenhui</i>	842
Gamma radiation effect on a murataite ceramic doped with Sr and Cs	<i>Aicha Maachou, Salah Blizak, Nour El Hayet Kamel, Dalila Moudir, Badis Rahal, Ali Sari, Yasmina Mouheb and Soumia Kamariz</i>	853
Study on properties of slag - heavy calcium powder - cement composite cementitious materials	<i>Youshuai Zhao, Xuetao Yue, Yuhan Tang, Xuelei An and Xiaopeng Shang</i>	862
Evaluating the effects of graphic design elements on wear resistance and aesthetic qualities of ceramics	<i>Lijuan Shi</i>	871
Present status and prospects of thermal barrier coating materials: A review	<i>Jiahang Liu, Yiyong Wang, Zhe Lu, Yeon-Gil Jung, Guanlin Lyu, Yanwen Zhou, Jing Zhang and Yan Li</i>	875
Innovation development trends of ceramic technology based on patent analysis	<i>Ji Lei and Wang Xiaofan</i>	904
Design and performance study of high-reliable alumina ceramic composites for sports fitness equipment	<i>Dandan Zhao</i>	910
Comparative analysis of kaolin clay, wood, and metal in musical instrument durability, environmental resilience, and longevity	<i>Jiawei Zhao, Yan Zhu and Mingwei Li</i>	918
Study on electrical conductivity and flow properties of ceramic inks for ceramic surface pattern design	<i>Yijing Li and Binglu Chen</i>	922
Enhancing the durability and aesthetic quality of pottery through the integration of titania nanoceramics in glaze formulations	<i>Xueping Deng</i>	926
