

Volume 27, Number 1, February 2026

CONTENTS

Research Articles

| | | |
|--|--|----|
| Renewable SiO₂ from fly ash for sustainable ceramic and glaze applications | <i>Huei-Jyun Shih, Szu-Jung Lin, Ying-Chieh Lee and Ting-Fu Hong</i> | 1 |
| Scale-up synthesis of Nano-TiC powder with controllable particle size via salt-assisted combustion method | <i>Faqi Zhan, Yinyan Du, Hua Zhang, Min Zhu, Yuehong Zheng and Peiqing La</i> | 10 |
| Study on inner cylindrical surface quality of zirconia ceramic sleeves ground by Narrow-Grit-Face-Grinding-Wheels | <i>Yong Sha, Hao Zhang, Xiaogang Zhang and Di Cui</i> | 24 |
| Cobalt-modified Mg_{0.95}Zn_{0.05}TiO₃ ceramics with improved dielectric properties for microwave applications | <i>Ruei-Sung Yu, Cheng-Che Ho, Chun-Hong Chen, Yao-Chin Wang, Che-Hao Liao, Po-Cheng Chen and Shih-Hung Lin</i> | 37 |
| Influence of substitution of red mud on the properties of LC³ cement | <i>Lingyu Zhang, Yuwu Sui, Xianglong Meng, Yiwei Fu, Zhibo Zhang, Jialiang Wei, Zhixian Wang, Xiangman Deng and Shaoqi Zhang</i> | 48 |
| Effect of sintering parameters on the performance of low expansion glaze using for the electric porcelain | <i>Xueqing Yang, Zhixing Deng, Jiansheng Zha, Jieguang Song, Yue Liu, Changquan Yang, Jiangping Liao, Ziyi Chen and Qijun Chen</i> | 61 |
| Enhanced temperature stability of small-permittivity Li₃Mg₂SbO₅F₂-basic microwave dielectric ceramics through Ba₃(VO₄)₂ addition | <i>Cuijin Pei, Fanfan Pan, Qianjing Jia, Li Quan, Miao Chen, Weihong Liu, Guoguang Yao, Wei Zhang and Yansheng Wang</i> | 67 |
| Preparation of hierarchically porous silica ceramics using porous powders as raw materials and pore-forming agents | <i>Weichun Chang, Chunman Li, Xuwei Li, Xin Zhang, Xinshuang Guo, Guoxiang Zhou and Haifeng Guo</i> | 71 |
| Epitaxial growth and phase stabilization of κ-Ga₂O₃ on GaN templates via metal-organic chemical vapor deposition | <i>Dong Ho Lee, Jung-Bok Lee, Seon Jin Mun, Hyung Soo Ahn and Min Yang</i> | 79 |
| Effect of Na₂SO₃ inhibitor on the structural and morphological properties of PbSe thin films prepared by chemical bath deposition | <i>Metehan Önal</i> | 89 |
| Influence of process routes on microstructure and mechanical properties of AA 5083 alloy processed by equal channel angular extrusion | <i>T. Venugopal, R. Thirumalai, D. Tamilvendan and R. Prakash</i> | 96 |

| | | |
|---|---|-----|
| Tribological properties of Al 413 alloy hybrid metal matrix composites processed by melt stirred squeeze casting | <i>R. Srinivasan, M. Kamaraj, N. Dhasarathan and M. Naga Swapna Sri</i> | 105 |
| Radiation shielding, physico-mechanical properties, microstructure, and sintering ability relationships in reactive alumina ceramics | <i>Arife Yurdakul</i> | 113 |
| Enhancing the optical, magnetic, and photoluminescence properties of CaAl_2O_4 powders by adding iron, nickel, copper, and zinc | <i>Thanit Tangcharoen</i> | 130 |
| Cytocompatibility and bacterial resistance of polished versus glazed partially stabilized zirconia and lithium disilicate ceramics for dental applications | <i>Min-Gu Cho, Youngchae Cho and Deuk Yong Lee</i> | 141 |
| Mechanical and microstructural properties of synthetic fiber reinforced geopolymers exposed to acidic environments and freeze-thaw cycles in seawater | <i>Zahraa Mohammed Kamil Al-Mayali and Mahmoud Ziada</i> | 150 |
| Mechanical strength enhancement of aluminum nitride ceramics via h-BN-assisted sintering | <i>Xianju Zheng, Fang Li and Yuedong Chen</i> | 163 |
| Research and characterization of porous ceramic materials prepared from solid waste | <i>Yan Zhou, Xin Zhu and Jiao Yan</i> | 168 |
| Thermal properties and nano structural analysis of potassium/lanthanum co-doped mesoporous bioactive glass | <i>İsmail Seçkin Çardaklı</i> | 176 |
| Stress redistribution and vibration reduction in barbell bars using SiOC ceramic lattice structures | <i>Hongning Lv</i> | 185 |
